

Powering AI with Verified Human Intelligence

Connecting global AI companies with verified, highly skilled human intelligence across Africa.

SEED ROUND US\$500,000 • 2026

Miracle Oseni, Founder • Abuja, Nigeria

The supply chain for human judgment is broken

For AI companies

Verified talent is hard to find

Companies spend months recruiting, testing, and managing distributed workforces.

Inconsistent data quality

Unclear guidelines and weak QA produce datasets that degrade model performance.

Workforces don't scale

Large projects need hundreds of contributors on short notice — costly to build in-house.

Data security risk

Sensitive datasets demand secure handling that ad-hoc freelance networks can't guarantee.

For skilled professionals

Invisible to global clients

Skilled professionals in emerging markets lack access to enterprise AI projects.

Inconsistent opportunities

Work arrives unpredictably, with delayed or unclear payment processes.

No development pathway

Little structured training, certification, or career progression exists.

Existing providers distribute tasks. Nobody builds trusted, long-term workforce ecosystems.

An AI workforce infrastructure platform built on trust

MO AI gives enterprises one secure gateway to verified human intelligence — annotation, evaluation, RLHF, and human-in-the-loop services — delivered through five pillars:

Verified Workforce

Identity checks, skills assessment, and continuous performance monitoring for every contributor.

Multi-Layer QA

Contributor review, independent QA, senior validation, and client acceptance on every project.

Secure Operations

NDAs, encryption, role-based access, and audit logging protect client data and IP.

Scalable Delivery

A contributor network designed to expand with demand — from pilots to enterprise scale.

Human-Centered AI

Exceptional AI begins with exceptional human judgment — humans stay central to quality.

Managed services today → **proprietary AI Workforce Platform tomorrow** (client & contributor portals, intelligent task allocation, automated quality monitoring).

Demand for human intelligence is compounding

Generative AI boom

Every LLM release drives demand for evaluation, preference ranking, and RLHF.

Human-in-the-loop is mandatory

Oversight, validation, and safety review are now core to the AI lifecycle.

Multimodal complexity

Text, image, video, and audio models multiply annotation volume and difficulty.

Ethical AI & regulation

Fairness, transparency, and compliance require structured human evaluation.

Why Africa. Why now.

- A fast-growing population of educated, English-speaking professionals
- Rapidly improving internet connectivity across the continent
- Competitive operating costs with global quality standards
- Massively underrepresented in the global AI economy today

MO AI's position: the trusted gateway connecting African expertise with global AI innovation.

Full-lifecycle human intelligence services

AI Data Annotation

Image, video, text, audio & document labeling — NER, segmentation, bounding boxes, keypoints.

AI Model Evaluation

Response & prompt evaluation, preference ranking, hallucination detection, safety review.

RLHF

Structured human feedback: ranking, comparing, and writing ideal responses for LLMs.

Dataset Quality Assurance

Sampling, double review, accuracy measurement, and consistency validation before delivery.

Content Moderation

Text, image & video moderation aligned to client policy and community guidelines.

Human-in-the-Loop Ops

Live AI monitoring, edge-case review, model validation, and decision verification.

Serving healthcare, financial services, retail, autonomous systems, legal tech, and edtech.

A standardized delivery engine, every time

Continuous improvement: client feedback feeds back into training, workflows & contributor development.

B2B, recurring, and diversified

Revenue streams (target mix)

35% **Project-based contracts**
AI data annotation engagements

25% **Model evaluation & RLHF**
Higher-value expert feedback work

20% **Dedicated enterprise teams**
Monthly workforce subscriptions

10% **Dataset quality assurance**
Independent auditing & validation

5% **AI consulting**
Workflow design & dataset strategy

5% **Platform subscriptions**
Future: dashboards, analytics & APIs

Phased growth strategy

Phase 1 — Managed Services

Year 1

Internal PMs, QA specialists & verified contributors deliver enterprise projects.

Phase 2 — Enterprise Operations

Years 2–3

Dedicated teams, long-term SLAs, client dashboards & automated reporting.

Phase 3 — Technology Platform

Years 3–5

Full AI Workforce Platform: portals, task allocation, payments, analytics & APIs.

Value-based pricing • Enterprise SLAs • Recurring contracts prioritized over transactions

We compete on trust and quality — not price

Capability	MO AI	Typical provider
Verified contributors	✓	Limited
Multi-layer quality assurance	✓	Varies
Enterprise reporting & SLAs	✓	Limited
Dedicated account management	✓	Sometimes
Contributor development & certification	✓	Limited
Africa-focused talent strategy	✓	Rare

The landscape

Global workforce platforms

Scale, but variable quality and low contributor engagement.

BPO firms

Big workforces, little AI specialization.

Specialist annotation firms

Expert but small and narrow.

Freelance marketplaces

Cheap and fast — minimal verification or QA.

Moat over time: verified workforce database, quality framework, platform switching costs, brand trust.

Consultative enterprise sales, land-and-expand

LinkedIn-first B2B

Founder thought leadership, executive networking & targeted outreach via Sales Navigator.

Content & credibility

Case studies, white papers, webinars & industry insights that build enterprise trust.

Strategic partnerships

Universities, research communities, incubators & cloud providers.

Conferences & events

AI conferences, tech expos & enterprise networking forums.

The sales motion

1

Lead generation

Targeted outreach & inbound content

2

Discovery

Scope, quality & security requirements

3

Solution design

Custom proposal, pricing & SLAs

4

Pilot project

Small engagement proves delivery quality

5

Long-term partnership

Recurring contracts + quarterly reviews

A path to \$15M revenue in five years

**18–24 mo**

to operational break-even

70%+

recurring revenue by Year 2

200+

enterprise clients by Year 5

10,000+

verified contributors by Year 5

Conservative estimates; assumes steady enterprise acquisition, recurring contract adoption, and disciplined cost control.

From foundation to global scale

Built by an operator from inside the industry

Miracle Oseni

Founder & Chief Executive Officer

- Hands-on operator in the AI annotation economy — managing accounts, projects, and quality across multiple AI training platforms
- Built and runs a working annotation services operation with real client delivery experience
- Deep, practical knowledge of contributor verification, platform workflows, and payment operations in the African context
- Entrepreneurial track record spanning services and consumer brands

Planned leadership build-out

Chief Operating Officer

Delivery, workforce management & QA oversight

Chief Technology Officer

Platform development, security & infrastructure

Chief Financial Officer

Financial planning, reporting & compliance

Director of Business Development

Enterprise sales, marketing & partnerships

Year 1 team: 15–25 full-time staff + 100–300 verified contributors.

THE ASK

US\$500,000 seed round

30%

Technology platform development

Client & contributor portals, task allocation, quality analytics

20%

Workforce recruitment & training

Verification pipeline, skills assessment, contributor onboarding

20%

Sales & marketing

Enterprise outreach, brand, content & conferences

30%

Operations, working capital & compliance

Infrastructure 15% • working capital 10% • legal & contingency 5%

Funds a 12–18 month runway to platform v1, first recurring enterprise contracts, and break-even.

The future of AI will be built by people.

MO AI is building the trusted infrastructure that connects them to it — starting with Africa's most underestimated talent pool.

Let's build it together — join our seed round.
